6. Project Completed

M. Sc (Bioinformatics)

Study of rbcL & matK Gene Sequences and Establishment of Phylogenetic relationship using computational method in Zingiberales

Nature of Work: In the present study of *matK* and *rbcl* gene from Zingiberales was taken for the analysis of phylogenetic relationship among the species belongs to order Zingiberales. The order includes 68 genera bank and used for the analysis. The Sequences alignments were performed by Clustal W by MEGA and phylogenetic analyses were carried out by UPGMA method. Phylogenetic analysis of chloroplast *matK* gene form Zingiberales order for plant DNA and morphological data have been previously to construct phylogenies of the eight families of the Zingiberales.

7. Workshop Attended :

- i. Participated in National Conference on “*Advances in Biotechnology for Sustainable Agriculture*” on 20th to 21st June, 2014
- ii. Participated as Delegate in the workshop organized by *Bioinformatics Centre at MGIMS*, Sevagram on 9th to 10th, January 2017

8. Computer Skill : MS word, Presentation, Net surfing, data based preparation

9. My Vision

I did my graduation in Agriculture Biotechnology subject to help the Masses of Agrarian Community through Biotechnological Intervention. Again I did my post graduation in Bioinformatics science in first division to dissemination of biological science in the society. I will devote my services the rural community of India.

10. Declaration: I am here with declared that all the above information are true & correct.
